THURSDAY

August 13, 2026

⚡ TIME TRIAL RACE DAY ⚡

Find a flat, clear 1-mile route or outdoor 400m track (4 full laps + 9 meters). Warm up with a light 10-minute jog, perform 2 short strides, and let it fly.

Target Pace: 5:30 – 5:35 min/mile

CRITICAL TREADMILL EXECUTION NOTE: To hit these short, hyper-fast target paces accurately, do not stand on the belt while it speeds up. Instead, stand on the side rails, let the treadmill speed ramp up completely to 10.6 or 11.2 mph, hold onto the safety handrails, and carefully lower your feet onto the moving belt as you start your interval timer. Jump back out to the rails immediately when time expires.
